SUMMARY

I am an excited and open to learn developer and junior entrepreneur from Sakarya. I have worked in many projects during collage and early work life. Furthermore, I could define myself as agile, chatty, curious, thoughtful, researcher and bookworm.

EXPERIENCE

08/2020 - 11/2021

Development Team Leader - Scrum Master
Softinyo Bilişim ve Güvenlik Teknolojileri

As a Team Leader, my responsibilities were to plan, budget, execute and control the entire development project. Time to time developed some parts of projects myself, but mostly my duty was to meet up with clients, get their needs, translate it into IT, design the structure of project, create transcripts, design DB schemes, create teams and tasks, control development process, test finished parts of the project and be responsible to the client and the management with progress.

Tech Stack:

- Trello
- Jira
- AWS Device Farm (to run automated tests and demo show)
- CI/CD Pipelines
- Bitbucket
- Lucid Chart
- Excel

01/2020 - 08/2020

Server Side Developer
Softinyo Bilişim ve Güvenlik Teknolojileri

Developed Server side API and Web Management applications during this role. Developed various internal API and performed external API bindings. Mostly used PHP and Python on this role.

Tech Stack:

- MySQLi and PDO (PHP)
- SQL Injection protection algorithms (both on PHP and Python)
- MySQL DB
- Python Flask, CherryPy, Django, Django Rest
- jQuery and Ajax
- Bootstrap 3 & 4
- Docker and Containers

Experience gained on:

- Backend of E-commerce applications
- API development
- API Gateway development
- Dockerizing and testing
- Web administration panel development
- Integrating payment systems (like Iyzico, PayTR, Google Pay, PayPal)
- Understanding needs of client and develop proper solution

| 01/2020 - 08/2020 | **Mobile Developer** |
| | Softinyo Bilişim ve Güvenlik Teknolojileri |

As a mobile developer, I was responsible to develop the mobile sides of various projects.

Those projects could be categorized as text based games, e-commerce applications, e-learning platforms and so on.

Mostly used Flutter/Dart for development, but in side of Flutter I used Java(Android) and Xamarin.

Tech Stack and experience gained on while performing this role:

- State Management Solutions on Flutter - Provider, GetX
- Audio packages development
- Package development (Native Android Side)
- UI Development
- Backend Development

| 03/2019 - 08/2019 | **Project Consultant And Manager** |
| | 4M Teknoloji |

Managing, Planning and Consulting the Curriculum of Robotics projects for High School level students.

| 02/2019 - 09/2019 | **Co-founder and Communication Software Developer** |
| | Project T4H |

Development of Mavlink applications for UAV.

Experience gained on:

PyMavlink,

Dronekit,

Gazebo STL

| 01/2018 - 07/2018 | **Educator** |
| | 4M Teknoloji |

Educating basics of electronics and algorithms to 5-15 years old kids.

- Basic sensor and electronics
- C/C++ Coding
- Arduino

| 10/ - 01/2018 | **Technical Support Specialist** |
| | 4M Teknoloji |

Technical Support on IT devices (PC, Network, 3D Printers)

EDUCATION

2021	**Information Systems Engineering**
	Sakarya University
	Bachelor's Degree

- Founding and Managing very first UAV community and team of the university.

CERTIFICATES

| 01/2018 - Present | **Kubernetes in the Google Cloud** |

SKILLS

Python	Advanced	Java	Intermediate
PHP	Advanced	Xamarin	Advanced
Flutter	Advanced	Arduino	Advanced
C#	Advanced	Sensors And Electronics	Advanced
SQL	Expert	C++	Beginner

LANGUAGES

English	Fluent	Turkish	Native
Russian	Basic	Azerbaijani	Native
Georgian	Intermediate	Polish	Basic
